AS9100 for metalweb

metalweb are pleased to announce it has achieved registration to the aerospace standard AS9100. The assessment by IMS confirms that the company is now able to supply aerospace materials to those customers who require this standard.

metalweb is part of the world's largest and leading aerospace material stockholder – Reliance Steel & Aluminum – www.rsac.com – so the AS9100 is a natural development for metalweb. With access to unrivalled stocks of aerospace material from North America and around the globe, metalweb can now offer customers a real alternative in aerospace material provision.

“With the AS9100 achievement metalweb are well placed to meet the requirements of being a 21st century materials supplier. Since we first started Metalweb in 2001 we have regularly been asked by our customers to satisfy their aerospace material requirements. Clearly we are pleased to announce we are now in a position to meet this demand, and will look to extend our industry leading levels of service and quality to this sector” said Derek Webb, Managing Director.
