Dear Chris

As you know, one of the outcomes of the Government/Automotive Industry meeting on 27 November was agreement that BERR should work with the motorsport and high performance engineering companies and the Motorsport Industry Association (MIA) to communicate to their suppliers, information on support that might be available from the Government and elsewhere.

To this end, I hope you will forward the attached letter from me, and attachments, to your UK supply chain.

The attachments set out what support is currently available, or planned for the near future, together with information on where to get further detailed advice on the schemes, eligibility and relevance to your suppliers' business needs.

While support, under any of these schemes, cannot be guaranteed, please encourage your suppliers to consider carefully whether they are relevant to their businesses and to make the most of any opportunities that might be available.

Yours sincerely

-

Ian Pearson MP
Economic and Business Minister
BERR
