CLIMATE CHANGE LEVY DISCOUNT FOR USERS OF CARBON FIBRE

Composites UK is the trade association for companies working in the fibre reinforced polymer composites supply chain. Working with Briar Associates, an environmental consultant, we have identified a scheme by which companies using carbon fibre can obtain discount from the Climate Change Levy - a tax burden on site utility bills.

This could represent a substantial saving for you if your site energy costs are more than £50k per annum.

All areas of carbon fibre usage qualify including intermediate 'pre-preg' & woven products and moulded/pressed carbon fibre components.

An additional energy tax reduction will result if your site or your group use more than 6MkWhpa of electricity, and have a tax burden under the CRC Energy Efficiency Scheme.

Briar Associates will assess your energy use related to the use of carbon fibre and establish your eligibility for the scheme. There are no fees in advance, these would only apply after you have received a rebate and/or a reduction in bills, with savings which can be back-dated to April 2014.

HOW TO GET INVOLVED

Contact us on info@compositesuk.co.uk for more information or alternatively contact Phil Brewerton at Briar Associates directly on phil.brewerton@briarassociates.co.uk or 07971 019818.
